**NEWS RELEASE**

**Redline Extends its Global Leadership in Public Security Solutions with Delivery of Wireless Broadband Network to the Turkish National Police**

*-- Company's Fixed WiMAX system to power video surveillance networks throughout Isparta, Turkey to strengthen public safety --*

**Toronto, ON, May 4, 2010** – Traffic control and public safety in Isparta, Turkey will be significantly enhanced with the introduction of a wireless state-of-the-art video surveillance system powered by Redline Communications Group Inc. (“Redline”) (TSX: RDL). The high-speed broadband wireless network will provide seamless, round-the-clock city-wide wireless connectivity between the cameras and the Turkish National Police controlling traffic and watching out for the security of the public. High resolution cameras with pan-tilt-zoom (PTZ) capabilities controlled by motion detectors provide additional visibility to police on the streets, and allows for the dispatch of additional officers when and where needed. This system is one of many deployments of Redline’s wireless infrastructure enabling High Definition video surveillance for public security agencies around the world - further establishing the company as a leading provider of WiMAX and broadband wireless infrastructure products worldwide.

“This video surveillance system represents the absolute state-of-the-art in video technology,” according to Han Mutlu, President of Global Forte who completed the installation of the system. “With state-of-the-art comes complexity, and Redline had the only broadband radio system capable of supporting these new and demanding server applications for Advanced Video Functions. Redline made it possible for us to implement the best video technology available, and their ability to create multicast groups within our wireless network allows the National Police to share their video security resources with security divisions.”

“We’re very pleased to be working with the Turkish National Police as they move forward to strengthen and enhance their existing public safety infrastructure,” says Eric Melka, acting CEO, Redline Communications, Inc. “The ever-increasing importance of public safety projects has led to the development of video surveillance systems with very complex requirements– and we support the complete video solution unlike any other broadband radio system available today.”

### **Forward-Looking Statements**

Certain statements in this release, including the estimate of future revenues, sales, provided above, constitute forward-looking statements or forward-looking information within the meaning of applicable securities laws. In some cases, forward-looking statements can be identified by terms such as "could", "expect", "may", "will", "anticipate", "believe", "intend", "estimate", "plan", "potential", "project" or other expressions concerning matters that are not historical facts. Readers are cautioned not to place undue reliance upon any such forward-looking statements.

Such forward-looking statements are not promises or guarantees of future performance and involve both known and unknown risks and uncertainties that may cause the actual results, performance or achievements or developments of Redline to differ materially from the results, performance, achievements or developments expressed or implied by such forward-looking statements. Forward-looking statements, by their nature, are based on certain assumptions regarding expected growth, management's current plans, estimates, projections, beliefs, opinions and business prospects and opportunities (collectively, the "Assumptions"). While the Company considers these Assumptions to be reasonable, based on the information currently available, they may prove to be incorrect.

Many risks, uncertainties and other factors could cause the actual results of Redline to differ materially from the results, performance, achievements or developments expressed or implied by such forward-looking statements. These risks, uncertainties and other factors include but are not limited to the following: significant competition, competitive pricing practices, cautious capital spending by customers, industry consolidations, rapidly changing technologies, evolving industry standards, frequent new product introductions, short product life cycles and other trends and industry characteristics affecting the telecommunications industry; any material, adverse affects on Redline's performance if its expectations regarding market demand for particular products prove to be wrong; any negative developments associated with Redline's suppliers and contract manufacturing agreements including the Company's reliance on certain suppliers for key components; potential penalties, damages or cancelled customer contracts from failure to meet delivery and installation deadlines and any defects or errors in Redline's current or planned products; fluctuations in foreign currency exchange rates; potential higher operational and financial risks associated with Redline's efforts to expand internationally; a failure to protect Redline's intellectual property rights, or any adverse judgments or settlements arising out of disputes regarding intellectual property; changes in regulation of the wireless industry or other aspects of the industry; any failure to successfully operate or integrate strategic acquisitions, or failure to consummate or succeed with strategic alliances; and Redline's potential inability to attract or retain the personnel necessary to achieve its business objectives or to maintain an effective risk management strategy (collectively, the "Risks"). For additional information on these Risks, see Redline's most recently filed Annual Information Form ("AIF") and 2008 Annual MD&A, which are available on SEDAR at [www.sedar.com](http://www.sedar.com) and on the Company's website at [www.redlinecommunications.com](http://www.redlinecommunications.com). Redline assumes no obligation to update or revise any forward-looking statements or forward-looking information, whether as a result of new information, future events or otherwise, except as expressly required by law. All forward looking statements contained in this release are expressly qualified in their entirety by this cautionary statement.
