- Cost effective with a low Total Cost of Ownership (TCO)
- Scalable, flexible and designed for Microsoft environments
- Meet regulatory compliance initiatives
- Offers easy and intuitive administration through seamless integration with Microsoft Active Directory
- Mix & match with wide variety of hardware and software token options

Secure remote access to your organization's essential networks and resources.

SafeWord 2008 is an out-of-the-box One-Time Password (OTP) two-factor authentication solution that enables secure remote access to your organization's most sensitive and confidential resources and applications. SafeWord 2008 offers both hardware and software authenticators, as well as management software and maintenance, in an all-in-one OTP authentication solution that is easy to install, use and manage.

#### Add Vital Security to your Remote Access Applications

Your VPN is your organization's remote link to its invaluable network assets. SafeNet's all-in-one OTP solution, SafeWord 2008, adds a vital security component to users of VPNs, Citrix applications, Outlook Web Access and other Web-based applications. SafeWord 2008 works with a wide variety of popular access platforms, and is available in branded solutions for Citrix, Cisco, Check Point, and Nortel. Choose any combination of SafeWord authenticators that best suits your remote access environment, and be up and running in minutes with fast, easy installation.

#### Secure Access to Essential Networks and Resources

With the push of a button, SafeWord authenticators generate a highly secure, one-time password that can never be re-used, hacked, or compromised. The password's two-factor authentication mechanism ensures that only properly authenticated users can access critical applications and data. And for organizations seeking more flexible, on-the-go authentication options, SafeWord's MobilePASS software authentication solution provides OTP functionality on mobile and desktop devices.

#### Fully Integrated with Windows Infrastructure

With SafeWord 2008, Organizations seeking to protect sensitive network resources can leverage existing Windows environments to implement a simple and straightforward authentication solution. Balancing security, ease-of-use and convenience, SafeWord is ideal for today's mobile and virtual workforce, enabling secure access for:

- field reps and consultants
- home office workers
- guest and temporary workers
- personnel who access a common workstation/work environment
- business partners who access a private network
- customers who access a public-facing Web application
- healthcare professionals accessing secure data

## Get Started with SafeWord 2008

SafeWord 2008 Starter and Evaluation Packs are available and come with everything you need to easily deploy two-factor authentication.

- Hardware and software-based authenticators
- SafeWord 2008 installation software and Quick Start Guides
- First year of technical support
- Lifetime token warranty

SafeWord 2008 upgrade packages are available for existing customers

## Lifetime Token Warranty

SafeWord 2008 authenticators never expire and come with a lifetime token warranty. SafeWord eliminates the need to replace and deploy new authenticators every three years and helps reduce your total cost of ownership. Simply return authenticators at any time for a free replacement. You must be current on your support contract for all of your users to be eligible.

## Meet Industry Security and Privacy Compliance Requirements

SafeWord 2008's strong authentication, access control, audit logging and comprehensive reporting capabilities enable your organization to meet compliance requirements for security and privacy standards including:

- Payment Card Industry Data Security Standard (PCI)
- Health Insurance Portability and Accountability Act (HIPAA)
- Federal Financial Institutions Examinations Council (FFIEC)
- Homeland Security Presidential Directive 12 (HSPD-12)
- Sarbanes-Oxley Act (SOX)
- Gramm-Leach-Bliley Act (GLBA)

## Effective Management for SafeNet's Versatile OTP Authenticators

SafeWord 2008 provides seamless integration with Active Directory and intuitive and easy-to-implement management for SafeNet's range of OTP authenticators. These include the MobilePASS software authentication solution as well as the eToken PASS and Gold hardware tokens. Additional management capabilities are available with the complementary Enterprise Solution Pack (ESP) which lets you manage users outside of Microsoft Active Directory and also enables you to set-up user self-help and enrollment capabilities, thus ensuring simplified deployment and maintenance.

## Evolves with your Business Needs

Your business needs will evolve and grow into tomorrow, and that's why SafeWord 2008 can migrate seamlessly to additional SafeNet management platforms. This flexibility allows you to expand your current authentication setup and add advanced certificate-based security applications such as digital signatures, data protection and password management solutions, without having to replace your current authentication infrastructure.

## The SafeNet Family of Authentication Solutions

SafeNet's suite of authentication solutions includes certificate-based, OTP, hybrid and software authenticators. All authenticators, together with SafeNet's extensive management platforms and security applications, empower you to:

- **Conduct business securely and efficiently** and open new market opportunities with innovative products that enable secure remote access and advanced security applications such as certificate-based authentication, digital signing and pre-boot authentication.
- **Reduce risk with** strong authentication solutions that prevent fraud and data theft and enable compliance to industry regulations.
